

## US 422 Improvement Project Update

**LOWER PROVIDENCE TOWNSHIP** (*December 21, 2016*) - Work is advancing on the project to improve travel and reduce congestion on US Route 422 between the Route 363 (Trooper Road) and Route 23 (Valley Forge Road) interchanges. The focal point of the improvements is the replacement and expansion of the US 422 bridge over the Schuylkill River, S. Trooper Road, the Norfolk Southern Railroad and the Schuylkill River Trail.

In the coming months, two lanes of westbound U.S. 422 traffic will shift over to the eastbound side of the highway approaching the Route 363 Interchange for the reconstruction of the westbound lanes in this area. The westbound exit ramp at Route 363 will remain open to traffic.

The project also includes the replacement of the Route 23 bridge over US 422. The traffic pattern currently in place on the bridge will be in place through summer 2017 and it's anticipated that the Route 23 on-ramp to US 422 will close sometime in the spring for approximately four months.
